PROJECTS

ZestCo — Full Stack Real-time Grocery Ecosystem

Tech Stack: Next.js 15, Socket.IO, Redux Toolkit, Auth.js, MongoDB, Stripe, Recharts

Live: zestco.vercel.app

- Engineered a high-performance grocery platform using Next.js 15 and Turbopack, optimizing SSR and mobile-first UI with Tailwind CSS and Framer Motion.
- Built real-time order tracking and chat using Socket.IO and WebSockets for live delivery updates and instant communication.
- Integrated Stripe Payment Gateway for secure payments; implemented RBAC using Auth.js (v5) for multi-role dashboards.
- Used Recharts to visualize sales, orders, and revenue analytics — reduced dashboard load time by 40%.

RadiAntiX — Full Stack Job Portal

Tech Stack: React.js, Node.js, Express, MongoDB, Redux Toolkit, Cloudinary, Multer, Recharts

Live: job-portal-project-q2it.onrender.com

- Developed a full-stack MERN job portal with JWT authentication and Cookie-parser for secure session management.
- Integrated Cloudinary and Multer for efficient resume and profile media uploads and management.
- Built analytics dashboard using Recharts — improved data insights by 35%. Architected scalable REST APIs with Bcrypt.js.

Personal Developer Portfolio Website

Tech Stack: React.js, Vite, Tailwind CSS, Framer Motion, Vercel, Web3Forms, Recharts

Live: kumar-pintu.vercel.app

- Designed a fully responsive portfolio using React.js and Vite with modern UI practices and performance-optimized architecture.
- Added Framer Motion animations, Recharts analytics, Web3Forms contact integration, and deployed via GitHub CI/CD on Vercel.
